

Seeking experiences for a research study:

"*Funding Models and the Integration of Registered Nurses in Primary Health Care Teams*"

We're interested

In Ontario, various funding models are used for interdisciplinary teams. Relatively little is known about the impact of funding models on the role of **Family Practice Registered Nurses** in primary health care.

Your contributions

At each clinic we would like to interview a **Registered Nurse**, a **Family Physician**, and a **Clinic Administrator** (*if applicable*). Registered Nurses will also be asked to complete a brief online 10-day workload log. You may be compensated for your time.

Significance

This is part of a cross provincial CIHR funded project. The study will provide important information on optimizing family practice nursing within primary health care

Contact us

If you work in an **Ontario based primary care clinic that employs RNs** and are interested in participating, have questions, or would like more information, please contact researchers at Western University: leslie.meredith@schulich.uwo.ca
