

# Are you curious about the impact that Artificial Intelligence might have on health care?

Participate in a study supporting excellence in research and health equity!

## Co-designing a “Fairness Dashboard” for Clinical Applications of Artificial Intelligence in Mental Health

### Purpose of the Study:

Our goal is to determine how (or even if) equity-deserving groups want to inhabit and be visually represented within a visual exploratory tool designed to support fair clinical AI applications in mental health.

### Study Details:

- You will be introduced to the emerging role of AI in health care;
- You will be asked to share your thoughts and feelings about data visualization of sociodemographic data in a small group discussion;
- You will be compensated with an honorarium for your participation.

### Eligibility

1. A person with lived experience of mental illness;
2. A person who has experienced systemic or interpersonal forms of discrimination.

Inclusive of people with diverse lived-experiences, including those who use drugs, people experiencing housing instability, and newcomers to Canada.
